It's certainly an interesting web-based system and a great way to manage your work. We first wrote about Slatwall when we featured a webinar on the system last year. I was intrigued at that time because it seems the product is still moving along nicely. Last month, Slatwall released version 1.2 of their web-based project management and collaboration tool. The new version updates the system's user interface and adds features like customizable timelines and audio and video recording. You can read more about the updates on the company's site. What are your thoughts on this web-based tool? Does it help you manage your projects better? Please share any thoughts in the comments below.The present invention relates to a power transmission mechanism which is constituted to simultaneously transmit rotational force from a prime mover to an actuator and the rotational force from the actuator to the prime mover by means of a lever and a bearing, and which can be used as a drive mechanism for a camera body of a camera or the like.
